

Brain Networks in Neuroscience: Personalization Unveiled Via Artificial Intelligence

Editors:

Md. Mehedi Hassan, Khulna University, Bangladesh
Farhana Yasmin, Nanjing University of Information Science and
Technology, China
Sheikh Mohammed Shariful Islam, Deakin University, Australia
Anupam Kumar Bairagi, Khulna University, Bangladesh
Si Thu Aung, State University of New York at Buffalo, USA

This book is an in-depth exploration of brain networks, providing a comprehensive understanding of their structures, functions, and implications for personalization through artificial intelligence. Readers will gain insights into the intricate workings of the brain, making this book an indispensable resource for those seeking a thorough grasp of neuroscience concepts. It offers the seamless integration of neuroscience principles with artificial intelligence applications. The book bridges these two domains, elucidating how advancements in AI draw inspiration from the complexities of the human brain. This interdisciplinary approach sets the book apart, offering readers a holistic view of cutting-edge technologies. Readers can expect practical applications and real-world case studies that illustrate the tangible benefits of the concepts discussed. From personalized healthcare solutions to adaptive learning systems, the book goes beyond theory, empowering readers to apply knowledge in diverse domains. This practical emphasis enhances the book's relevance for professionals and researchers alike. The inclusion of online enhancements, such as interactive visualizations, downloadable supplementary materials, and engaging video content, transforms the reading experience into an interactive learning journey. This added value distinguishes the book by providing readers with hands-on tools to deepen their understanding and apply newfound knowledge.

This book doesn't just dwell on current technologies; it takes readers into the future by exploring emerging trends at the intersection of neuroscience and artificial intelligence. By delving into potential breakthroughs and innovations, the book equips readers with insights that are forward-thinking and relevant in an ever-evolving technological landscape.

TABLE OF CONTENTS

1. Exploring Brain Connectivity: Structural, Functional, and Effective Networks in Neuroscience
2. Advances in Brain Imaging Technologies: A Comprehensive Overview
3. Understanding Brain Connectivity: From Synapses to Networks
4. Artificial Intelligence in Neuroscience
5. Personalized Neurology: Tailoring Treatments with AI Insights
6. Brain Network Dynamics: Implications for Health and Disease
7. Neural Dynamics: Unraveling the Complexity of Brain Activity
8. Decoding Brain Signals: Perspectives from AI-powered Examination
9. Neuroimaging Techniques: Innovations and Applications
10. Intelligent Movement-controlled Brain-Computer Interface System based on an EEG Signal
11. Decoding Brain Signals with Machine Learning: Innovations and Applications in Neuroscience
12. Interpreting Brain Signals: Insights from AI-driven Analysis
13. Neuroinformatics in the Era of Personalized Neuroscience
14. Deciphering Minds and Motion: A Unified Exploration of Brain Signal Decoding and Activity Recognition through AI-driven Analysis

BRAIN NETWORKS IN NEUROSCIENCE

PERSONALIZATION UNVEILED
VIA ARTIFICIAL INTELLIGENCE
